CIRCLE-2 Adaptation Inspiration Book (2013)

Description

This is the first book on implemented climate change adaptation in Europe. For the first time a large survey has been done to collect measures that have been taken to adapt to climate change in Europe. 22 Case studies of early adaptors in Europe have been collected and visualized in the Adaptation Inspiration Book, made as part of CIRCLE-2, a European Network of 34 institutions from 23 countries committed to fund research and share knowledge on climate adaptation and the promotion of long-term cooperation among national and regional climate change programmes. It is CIRCLE-2's hope that this book will inspire and teach professionals, policy makers and researchers to initiate their own local adaptation projects or improve current strategies and plans for adapting to climate change.
